[anthonyobi99@gmail.com](mailto:anthonyobi99@gmail.com) | 07823466019 | Leeds, UK | [LinkedIn](#) | [GitHub](#)

## SKILLS

- **Programming Languages:** C++, JavaScript, Python
- **Front-end Frameworks:** Next.JS, React, HTML, CSS, Material UI.
- **Open-Source Technologies:** Node.JS.
- **Building/Hosting Tools:** GitHub, Vercel

## WORK EXPERIENCE

**July 2024 – HEADSTARTER AI**

**Present Software Engineering Fellow USA (Remote)**

- Built a [personal website](#) that showcases my skills and project using HTML5 templates and improving upon it using JavaScript for the functionality, HTML and CSS for the styling.
- Built an [inventory management app](#) that enables users to add items to their inventory, monitor quantities, and remove items when they're sold or used, using Next.js as my React framework, Material-UI for creating a sleek and responsive user interface, and Firebase Firestore as my backend database. This powerful combination of technologies allowed me to develop a real-time web application that's both scalable and user-friendly.

**Jan 2022 – OPTIVA CAPITAL PARTNERS**

**Sep 2022 Relationship Management Executive/Marketer Lagos, Nigeria**

- Successfully brought in over USD 700,000 in revenue by closing six immigration investment sales, four wealth management sales, and four insurance deals with clients and prospects.
- Drove the national recognition of the organization by pitching sales to government officials and politicians.

**Feb 2021 – SESCO RENEWABLES LTD**

**Lagos, Nigeria**

**Dec 2021 Junior Systems Engineer**

- Led site surveys and audits for data collection to design optimal solar power systems.
- Implemented Coolnomix technology for HVAC systems to optimize energy consumption.
- Utilized VRM and CCGX platforms for remote monitoring and control of solar powered inverter systems.
- Performed on-site troubleshooting and resolved technical issues to ensure system functionality.
- Implemented smart socket technologies (Teckin socket & Sonoff) and configured them via Ewelink to automate energy consumption in facilities with solar power systems.
- Conducted energy audits using Efergy to recommend energy conservation solutions.

## Achievements:

- Reduced shutdown of facilities to a complete zero by effective remote monitoring, several site surveys, and audits of the Solar powered inverter systems for the acquisition of data via VRM or CCGX.
- Led and managed the expansion and implementation of renewable energy projects to five more facilities.

April 2019 – **TECHCRAT INDUSTRIAL AUTOMATION LTD** **Lagos, Nigeria**  
Feb 2020 **Junior Automation Engineer (Graduate Trainee)**

- Successfully completed industrial automation projects at various client sites, demonstrating expertise in PLC programming, system integration, and troubleshooting.
- **Nigerian Tank Cleaning Service (NTCS):** Upgraded control system using Allen Bradley Micro 800 PLC, implemented safety protocols, and installed new pressure/temperature transmitters for enhanced system performance.

#### Achievements:

- Completed the overhauling of a KAESER SK21 Air Compressor in Lagos's Nigerian Tank Cleaning Service by decommissioning a faulty and wrongly programmed Siemens Sigma controller and replacing it with an Allen Bradley Micro 800 controller and Micro800 LCD.
- **Iron Products Industries:** Enhanced machine functionality through installation of limit switches, VFD motor driver, and Allen Bradley MicroLogix 1000 PLC for accurate production processes.

May 2016 – **KONTZ Engineering Services LTD** **Lagos, Nigeria**  
Aug 2016 **Intern**

- Performed maintenance on security systems like baggage scanners and Mantrap doors, demonstrating technical proficiency.
- Participated in access control systems training, expanding knowledge base.

#### EDUCATION AND QUALIFICATIONS

2022 – 2024 Teesside University  
**MSc Instrumentation and Control Engineering (Distinction)**  
**Project: Development Of Smart Irrigation Systems That Uses Wastewater (A MATLAB/Simulink Simulation)**

2014–2018 Regent University of Science and Technology  
**BE Applied Electronics and Systems Engineering (First Class)**  
**Project: Design and Construction of a Smart Solar Grass Cutter.**

#### PERSONAL PROJECT(S)

- [Shopping Cart with JavaScript](#) This project shows the core functionality of an eCommerce shopping cart for a cloth market. There's a collection of products and then some functionality to add, remove, and change the quantity of a product in a shopping cart. There is also the checkout function: making a purchase and returning change.
